**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Or

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 35, 36, 42, 43 & 44 are rejected under 35 U.S.C. 102(e) as being anticipated by USP 6,647,649 to Hunt et al. (herein referred to as "Hunt").

Hunt teaches a microparticle taggant having two or more distinguishable marker layers corresponding to a predetermined numeric code, namely a binary code (see abstract & col. 3, lines 14-20). The binary system comprises two bits, 0 and 1 (col. 4, lines 60-67).

3. Claims 50, 51, 54 & 55 are rejected under 35 U.S.C. 102(b) as being anticipated by USP 5,760,394 to Welle (herein referred to as "Welle").

Welle teaches a method of identifying and authenticating products wherein a first taggant and a second isotopic taggant are used in combination. See col. 2, lines 31-67. By this method a batch of products can be distinguished and identified.

*Allowable Subject Matter*

4. Claims 37, 48 & 49 are allowed.
5. The following is a statement of reasons for the indication of allowable subject matter: the prior art does not teach or suggest the method of encoding a taggant system or chemical taggant such as that instantly claimed.
